

112 E. Francis / Pampa, TX 79065 / www.centramedia.com

MEDIA ALERT

During the Amarillo Chamber of Commerce's 2006 Business Connection Trade Show on Tuesday, May 9, Pampa-based Centramedia will introduce a new technology which could benefit area municipalities: city-wide mesh networks. While Centramedia is the only technology company in the area introducing or offering this new product, mesh technology is versatile and is currently being used elsewhere for security and surveillance purposes, city-wide wireless Internet services and first-responder/public safety needs as well as for enterprises, schools, universities and public Internet/WiFi hotspots. During the event, Centramedia's team of professionals will be on hand to answer questions about this new technology, demonstrate the inner workings of a city-wide mesh network and share how it can provide a benefit to area-wide communities.

- WHO:** Tarell Dyer, Technical Sales Director
Mike Inverso, Product Sales Specialist, Trango Broadband Wireless
- WHAT:** Information and demonstration of wireless, mesh technology system during 2006 Business Connection.
- WHEN:** Tuesday, May 9, 2006
10 a.m. – 6 p.m.
- WHERE:** Amarillo Civic Center
